ફ Pq	એ]	ઓ }	ળ L	લે 	લે —	

Conjunct characters:

A simple conjunct is typed by pressing **[x]** between the consonants.

e.g. **[n][x][n]** → **ꠤ꠆**

A joined conjunct is typed by pressing **[x][x]** between the consonants.

e.g. **[n][x][x][n]** → **ꠤ꠆꠆**

A non-joined conjunct is typed by pressing **[shift x]** between the consonants.

e.g. **[n][shift x][n]** → **ꠤ꠆ꠤ**

Alternative: To change one type of conjunct to another, press the backtick **[`]** key after it.

e.g. **ꠤ꠆[`] → ꠤ꠆꠆[`] → ꠤ꠆ꠤ**

Dependent/Independent Vowels:

The keyboard will normally produce independent vowels, except after consonants, when it will produce dependent vowels.

e.g. **[i]** → **꠆** **[g][i]** → **ꠤ꠆**

To force an independent vowel after a consonant, press **[a]** after the consonant.

e.g. **[g][a][i]** → **ꠤ꠆꠆**

Alternative: To change one type of vowel to the other, press the backtick **[`]** key after it.

e.g. **ꠤ꠆[`] → ꠤ꠆꠆[`] → ꠤ꠆꠆꠆**

Alternate forms:

In addition to altering conjuncts and vowels, the backtick **[`]** key can produce changes like these:

e.g. **꠆[`] → 4** toggle digits: script ⇌ roman
"[`] → " toggle smart quotes on/off

Alternate characters:

Various related characters can be obtained by pressing the same key again without pausing.

e.g. **[n]** → **ꠤ** **[n]** → **ꠤ꠆** **[n]** → **ꠤ꠆꠆** **[n]** → **ꠤ꠆꠆꠆**

If you actually want a sequence of the character, either pause or press **[a]** in between.

e.g. **[n][n]** → **ꠤ꠆** **[n][a][n]** → **ꠤ꠆**

Smart Quotes:

Press the single quote **[']** or double quote **["]** key again to switch between left and right smart quotes. e.g. **"["] → "**

Brackets:

Press the open or close parenthesis key up to 3 more times to obtain alternative forms of bracketing.

e.g. **([([→ [(([→ [(([→ [**

Note to Advanced Users:

If you need an independent ZWJ or ZWNJ character (very rare), type **[space]** followed by **[x]** or **[shift x]** respectively.
