ਸ਼ z	ਸ s	ਹ h		ਰ਼ txr	ਜ਼ jxw	ਕ਼ kxr
ਫ਼ Pq						

Conjunct characters:

A simple conjunct is typed by pressing **[x]** between the consonants.

e.g. **[n][x][n]** → **ਨ਼**

A joined conjunct is typed by pressing **[x][x]** between the consonants.

e.g. **[n][x][x][n]** → **ਨ਼ਨ**

A non-joined conjunct is typed by pressing **[shift x]** between the consonants.

e.g. **[n][shift x][n]** → **ਨ੍ਨ**

Alternative: To change one type of conjunct to another, press the backtick **[`]** key after it.

e.g. **ਨ਼ [`]** → **ਨ਼ਨ**

Dependent/Independent Vowels:

The keyboard will normally produce independent vowels, except after consonants, when it will produce dependent vowels.

e.g. **[i]** → **ਇ** **[g][i]** → **ਗਿ**

To force an independent vowel after a consonant, press **[a]** after the consonant.

e.g. **[g][a][i]** → **ਗਇ**

Alternative: To change one type of vowel to the other, press the backtick **[`]** key after it.

e.g. **ਗਿ [`]** → **ਗਇ [`]** → **ਗਿ**

Alternate forms:

In addition to altering conjuncts and vowels, the backtick **[`]** key can produce changes like these:

e.g. **ੴ [`]** → **4** toggle digits: script ⇌ roman

Alternate characters:

Various related characters can be obtained by pressing the same key again without pausing.

e.g. **[n]** → **ਨ** **[n]** → **ਣ** **[n]** → **ਣ** **[n]** → **ਨ**

If you actually want a sequence of the character, either pause or press **[a]** in between.

e.g. **[n][n]** → **ਨਨ** **[n][a][n]** → **ਨਨ**

Smart Quotes:

Press the single quote **[']** or double quote **["]** key again to switch between left and right smart quotes. e.g. **" ["]** → **"**

Brackets:

Press the open or close parenthesis key up to 3 more times to obtain alternative forms of bracketing.

e.g. **([)]** → **[([)** → **([[)** → **[([)**

Note to Advanced Users:

If you need an independent ZWJ or ZWNJ character (very rare), type **[space]** followed by **[x]** or **[shift x]** respectively.
